GUIDED IMPLANT SURGERY

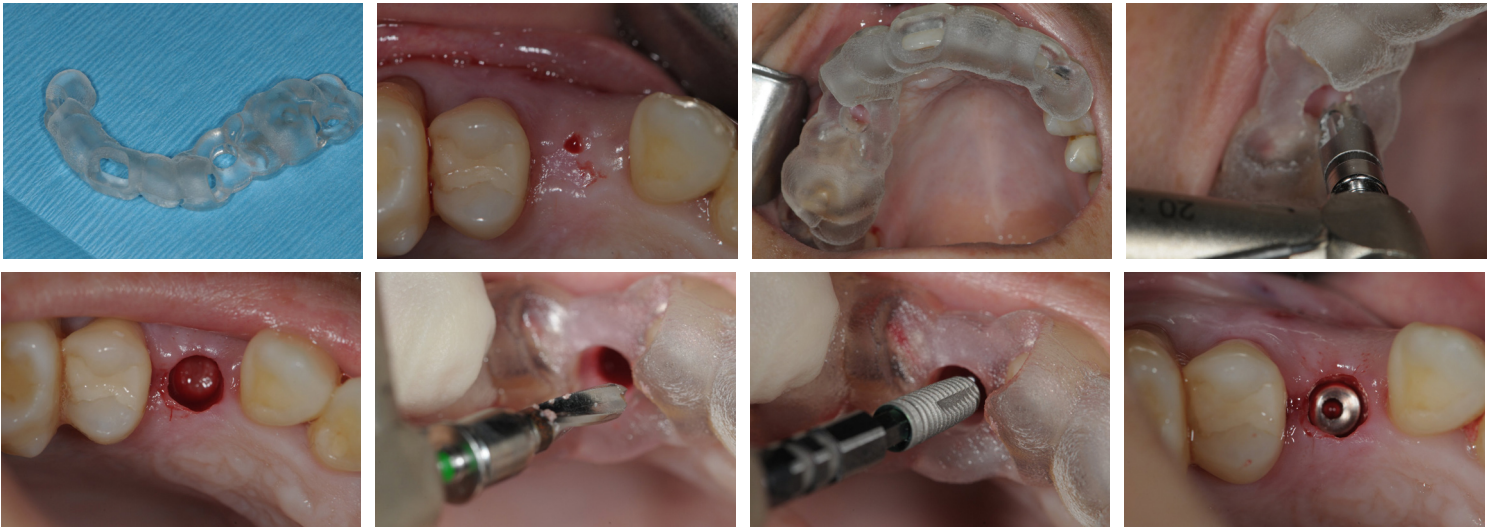

Hands-On Live Patient Program

COURSE OVERVIEW

This intensive two-day course begins with a morning lecture by Dr. Arun K. Garg, a dental implant expert and world-famous educator, followed by a review and discussion on how participants can improve their guided surgery technique.

Over the course of the program, students will learn all procedures specific to guided surgery CBCT for implantology, including prosthetic-driven digital treatment planning, digital case presentation, guide fabrication, guided implant instrumentation and protocols, immediate temporization with CAD/CAM digital implant impressions, abutment design and fabrication, abutment and hybrid abutment crown design, and fabrication protocols for single, multiple, and full-arch cases. All procedures are performed on actual patients in a state-of-the-art clinical setting under the supervision of Dr. Garg's expert staff.

ATTENDEES WILL LEARN

- All aspects of guided-implant planning using CBCT.
- Each of the various guided implant systems that are available on the market today.
- The instrumentation and methods used for guided surgical placement of implants.
- How to overcome anatomical limitations to achieve predictable implant positioning as the foundation for esthetic restoration.
