

It's All About *Hygiene*

**Learn The Art and Science
of Advanced Treatment Planning**

Advanced Case Presentation Skills

Develop the Ultimate Doctor-Hygiene Exam

The South Beach Dental Institute is now offering a course for hygienists, doctors and the entire team, presented by The JP Institute. The JP Institute has been empowering dental teams to provide comprehensive care since 1979. The core concept of ALL JP curriculum and workshops is the understanding that the mouth is a window to overall bodily health. This is the key foundational element to the success in teaching dentists and hygienists to recognize early disease and then implement a unique comprehensive clinical approach that prevents, treats and controls periodontal disease as well as improves overall patient health. The JP Institute has perfected the transformation process and communication necessary for the application of the academic, science, research systems and protocols.

Course Overview:

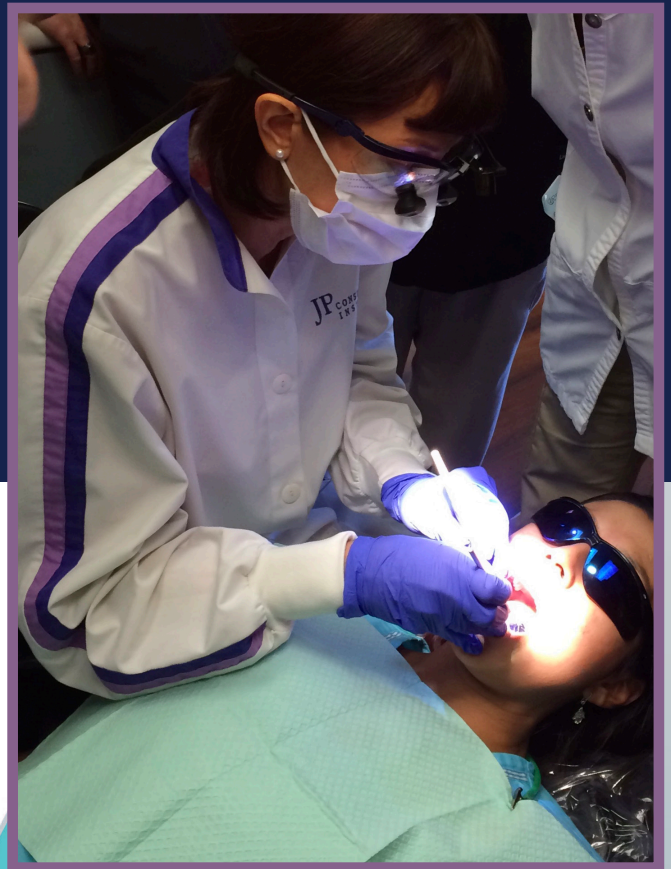

This course is designed for dentists, hygienists and auxiliary team members in an effort to radically enhance the services they provide. While dentists and hygienists are encouraged to enroll for both days of the two-day course in order to maximize their learning potential, support staff is welcome to attend day one for only half the cost.

“Effective non-surgical periodontal care should be part of every cosmetic and implant practice as all restorative work, should begin with a healthy foundation. I thought I had a great perio program in my practice. The JP Institute program at South Beach helped us tremendously by treating beyond the four quadrants of root planing and scaling, using superior methods and technology, functioning as an effective doctor-hygiene team and now the entire team is on the same page. Expect amazing clinical results and great case acceptance for your dentistry including implants!”

This program incorporates hands-on learning in a clinical setting. Participants are asked to bring safety glasses and 2 sets of instruments including explorer, mirror, and periodontal probe.

Updates for Clinical Delivery that Support Oral Systemic Health:

- ✓ Understand the dental medical model and redefined roles in dentistry
- ✓ Salivary Diagnostics to support the necessary treatment plans to reduce and eliminate the pathogenic load
- ✓ Prepare and maintain healthy tissue for sustainable success with implants
- ✓ Stress and Time management – How to fit it all in including support of ALL advanced procedures in your practice: Ortho, Implants, Airway, Aesthetics, Occlusion, Advanced Restorative and More
- ✓ Advanced Case Presentation Skills for the entire team- Increase restorative, aesthetic and periodontal case acceptance
- ✓ Adjunctive Therapies, cellular nutrition, antioxidants, cold laser, laser therapy, chairside testing and understanding inflammatory markers

Objectives

Learn The Art and Science of Advanced Treatment Planning: Oral systemic treatment planning includes considerations way beyond calculus removal and biofilm disruption for nonsurgical periodontal therapy.

- **Develop** the Ultimate Doctor-Hygiene exam for increased diagnosis and case acceptance.
- **Discover** keys to creating all-encompassing treatment plans that alter the host response and manage inflammation.
- **Integrate** advanced technologies, protocols and lifestyle management instrumental in achieving perfect tissue, zero bleeding (whenever possible) and promoting bone repair.
- **Learn** from clinicians that are practicing interdisciplinary healthcare and collaboration to achieve disease remission that supports whole body health.

- **Integrate the important business systems to support healthy profit margins.**

- **Interactive workshop exercises will provide a Step-by-Step implementation plan that you will take back to your practice for immediate application!**

Course Description

This is a dynamic clinical hands-on workshop for doctors, hygienists and the entire team to update scientific knowledge, unify philosophy and create continuity with protocols to achieve a higher level of clinical results for your patients!

Research and technological advances have created more opportunities to deliver comprehensive care, periodontal and overall health than at any other time in dentistry. A thriving profitable hygiene department that supports overall health and wellness is not only a fundamental part of a successful practice, but a major contributor to how patients perceive the value and quality of the dental services you provide!

Jan Lazarus RDH, HC

Jan Lazarus, a Certified Health Coach, is known as a thought provoking speaker, influencer, consultant and internationally recognized pioneer in the field of comprehensive continuing education in Dentistry. As a principle and President of JP Consultants Institute, Jan has developed life-changing curriculum for patients, dentists, hygienists and dental teams. The key foundational element to all of their programs since 1979 has been the understanding that the mouth is a “window” to overall bodily health.

Liz Lundry, RDH

Liz Lundry has been a practicing Dental Hygienist since 1979 when she graduated from Foothill College in Los Altos, California. She has been an in-office trainer since 1988 and earned her Laser Certification in 2000. As a consultant Liz works with dental practices all over North America through the JP Institute, providing hands-on technology training including lasers and ultrasonics, integration of nutrition, customized in-office coaching, and rigorous post-graduate seminars and workshops. She is a published author and a veteran clinician. As a speaker she has presented to national study clubs and state meetings. Liz also currently works in a general dental practice that offers state-of-the-art cosmetic and laser dentistry.
