IMPLANT DENTISTRY EDUCATION

RESTORING IMPLANT RETAINED HYBRID RESTORATIONS; WHAT TO DO AFTER THE SURGERY & CONVERSION OF PROSTHESIS

This course focuses on the steps that follow implant surgery and conversion appointments. It is designed for participants to achieve success in executing the highest level restorations. With these concise, step-by-step procedures in hand, clinicians will return to their home practice ready to begin treatment on Day 1!

This course includes both lecture and hands-on components and it incorporates numerous must-have skills. Our objective is that every participant returns home confident to perform these procedures and is able to instruct their staff accordingly with these techniques.

Implant Retained Hybrid Restorations

Course Overview:

You will not just sit and learn, you will perform! Our objective is for course attendees to take home enough confidence and knowledge to do these procedures and/or prep your staff and team members to do them.

Course Outline

3-DAY HANDS-ON LIVE PATIENT SURGERY WORKSHOP

All three days you will be working on patients under supervision and faculty guidance.

Day 1: Small Lecture. Hands-on Live Patient Surgery.

Day 2: Small Lecture. Hands-on Live Patient Surgery.

Day 3: Questions and answers. Hands-on Live Patient Surgery.

Attendees will learn:

- The correct tools to use
- How to take impressions to avoid fractures and failures
- How to duplicate your patient information to the lab through digital or conventional means
- Impression taking and important jig concepts
- Open tray procedures
- Easy-Bar impression – capturing the intaglio surface
- Duplicating the converted restoration in the mouth
- How to correctly take the bite record
- How to adjust the PMMA for information to the laboratory
- Creating the occlusal jig so there is minimal adjustment, if any, when you seat the prosthesis
- How to duplicate and transfer the modification to the lab with new bite, any adjustments, etc.
