

A COMPLETE LOOK AT DIAGNOSING AND TREATING PERIODONTAL DISEASE; FROM NON-SURGICAL TO SURGICAL SOLUTIONS

This is NOT your basic old school approach to Periodontal Disease. We will focus on different ways to both control and **treat periodontal disease** from minimally invasive to full flap and osseous recontouring approaches. Come see why and how to treat 5, 6, 7 mm pockets.

This hands-on course will **clarify diagnosis and treatment planning** to help general practitioners feel comfortable with different kinds of treatments, and the potential for success of these approaches, whether you choose to do some of it or refer it out.

This course includes multiple hands-on exercises and many case illustrations, plus live video demonstrations of the surgical techniques. The full day workshop offers the opportunity to **practice these procedures on pig jaws and anatomically correct models to do both osseous reduction as well as bone grafting.**

The course is designed to increase diagnostic and treatment planning skills plus offer patients long term success.

Participants will learn:

- To diagnose and treat osseous defects
- The role of occlusion in causing and controlling disease
- Minimally invasive antimicrobial methods
- Treatment choices – from non-surgical to surgical
- Bone grafting – products and membranes
- Long term maintenance care

Workshop participants receive a workbook detailing the procedures.

James Kohner D.D.S.

Dr. James Kohner is a leading specialist in the periodontal world of dental health. He is an expert in the management of periodontal infection using non-surgical methods, as well as being current on the latest procedures relating to

surgical therapy. He has presented at the American Academy of Periodontology meetings for many years, and presented lectures at the Harvard School of Dental Medicine. He is a current member of both the American Dental Association and the American Academy of Periodontology, plus is a professional member of the National Speakers Association. With over 35 years in the private practice of Periodontics and more than 20 years teaching, Dr. Kohner has the experience to make his courses meaningful.
