

Sedation Dentistry: The Anxiety-Reducing Oral Solution

2 DAY COURSE

COURSE OUTLINE

Lectures:

- Picking the Right Patients: Patient Assessment
- Understanding the Basics: Clinically Useful Pharmacology
- Keeping Patients Safe: Physiologic Monitoring
- Picking the Right Drugs: Inhalational & Oral Sedatives
- The Perfect Sedation Appointment: Appropriate Protocols
- Emergencies: Patient Safety and Reversal Agents

Educational Objectives:

- Discuss the principles of patient assessment and monitoring
- Understand the clinical useful pharmacology of sedative choices
- Learn how to match the right drug at the right dose to the right patient and the right procedure
- Describe the characteristics of the ideal sedatives for in-office use and give examples
- Understand the equipment required to monitor your patients safely
- Master the art of anxiolysis and plan for the perfect appointment
- The lecture portions of this seminar will be augmented with practical components to include Bag-Mask-Valve (BMV) breathing and a review of nitrous oxide machines, including monitoring equipment

Lectures:

- Management of patients with bleeding disorders or on Anticoagulants
- Dentistry and Drug Interactions
- Common Drugs for Uncommon Patients
- Herbal Concerns in Dentistry
- Diabetics and Cardiovascular Patients
- What's in Your Emergency Kit – and Why

Educational Objectives:

- Understand how to avoid or manage potential drug interactions
- Recognize potential herbal and drug interactions that can affect dentistry
- Know the medications you need to have in your emergency kit and how to use them
- Achieve optimal patient care through appropriate prescribing (especially for patients with cardiac issues and patients with bleeding risks)
- Describe the other tools you should have to ensure a safe treatment environment

Sedation Dentistry: The Anxiety Reducing Solution - 2 Day Course

This two-day course is designed to provide extensive knowledge on minimal oral sedation and nitrous oxide in accordance with the American Dental Association's Guidelines for the Use of Anesthesia and Sedation in the Dental Office. The lecture portions of this course will be augmented with a review of practical components to include bag-mask-valve (BMV) breathing and nitrous oxide machines, including monitoring equipment.

COURSE INSTRUCTOR

Jason H. Goodchild, DMD

Jason H. Goodchild, DMD is a graduate of Dickinson College in Carlisle, Pennsylvania. He received his dental training at the University of Pennsylvania School of Dental Medicine where he still holds a faculty position as a Clinical Associate in the Department of Oral Medicine. As part of his training and service in the Department of Oral Medicine he was educated in enteral sedation and completed numerous cases at the dental school and the Hospital of the University of the University of Pennsylvania. As a part of his faculty duties he treats patients with complex medical histories, and oversees students and residents.

He is also Clinical Assistant Professor in the Division of Oral Diagnosis, Department of Diagnostic Sciences at the New Jersey Dental School. He teaches the next generation of dentists excellence in patient care, and introduces the concepts of enteral sedation to fourth-year dental students in the classroom.

Dr. Goodchild has published numerous articles and spoken to many State Dental Boards on the topic of enteral sedation dentistry. He has been an invited speaker for the Academy of General Dentistry and American Association of Dental Examiners. He is a reviewer for the Journal of the American Dental Association, General Dentistry, and Quintessence International. He has also served as a grant reviewer for the National Institute of Health.

Dr. Goodchild maintains an active private practice in Havertown, Pennsylvania.
