UNLOCK YOUR POTENTIAL WITH

DENTAL CERAMICS

2-day Hands-on-Course
for dentists, dental assistants, clinical dental technicians. (16 CE hours)
COURSE OBJECTIVES

1. Provide students with an opportunity to be introduced to The Science and Art of Dental technology, forming and developing necessary knowledge and skills for characterizing, finishing and polishing CAD/CAM restorations using a wide variety of chair-side and laboratory products.

2. Through lectures and hands-on experience, create a learning environment where logic and creativity complement each other.

3. Course attendees will be exposed to the important basics of:

   » Color Theory, that enables dentists to be more effective with shade mapping and matching restorations to the existing dentition while finishing and finalizing CAD/CAM restorations;
   
   » Tooth and gum morphology necessary to achieve proper contour and anatomy of the milled restorations during hand milling;
   
   » The surface texture and its importance in natural appearance of the smile;
   
   » Creating natural looking, personalized smile design for patients (age, gender, temperament individualization);
   
   » All steps during the fabrication process of different types of final and provisional milled restorations, using proper dental materials and dental laboratory tools and equipment for fabrication of successful restorations in dental practice settings.
DAY-1

LECTURE
Unlock your potential with Dental Ceramics. The Science and Art of Dental laboratory techniques.
» Color theory and shade matching protocol, right choice with your CAD/CAM block tips;
» Creating natural looking smiles in consideration of patient gender, age, temperament;
» Dental anatomy and tooth morphology (detailed observation and analysis of anatomical details, surface texture of the natural teeth);

HANDS-ON EXPERIENCE

Black and white drawings of certain teeth morphological details. Dental anatomy refreshing course using creative and artistic right side of our brain.

DAY-2

LECTURE
Fabrication of natural looking CAD-CAM restorations in clinical settings
» Review the necessary tools and techniques for hand milling and correction; how do we add a human touch to our restorations and Why?
» Creating different types of surface texture
» Introduction to the Stain and Glaze technique as a top choice for finishing CAD/CAM restorations in clinical settings, one-day smile protocol
» 1-2 step techniques with Emax CAD/CAM restorations

DEMONSTRATION of finishing, staining and glazing max restorations by instructor

HAND-ON EXPERIENCE with finishing purple stage restorations, staining, glazing by students

COURSE INSTRUCTOR

Ms. Marina Caponigro, MDT, EFDA, BEd, has 30 years of combined experience and education in Dental Technology and Dental Assisting in Prosthodontics, Implant and Cosmetic Dentistry. “I really enjoyed this course. Great instructor with a lot of information and hands on. I learned a great deal of beneficial information.”

A.H. - Scotsbluff, NE

“I’ve learned so much & taken so much away from this course. I’ve never worked on anterior teeth so it was so great learning how to naturally texture and glaze crowns.”

M.W. - Scottsbluff, NE

“Marina is so energetic and passionate about ceramics and it definitely translate to all of us. I’m super excited about implementing all I’ve learned into my practice.”

S.J. - Midland, NC

“Great hands on experience helped me build confidence in same day anterior restorations.”

A.G. - Boca Raton, FL
