

SOFT TISSUE

Hands-on Live Patient Program

OCT
8-10
SANTO
DOMINGO

SOFT TISSUE PERIODONTAL SURGERY

Each morning there will be a lecture covering different topics, including: gingival recession and its treatment, connective tissue graft harvesting, free gingival graft procedures, and the Fibrin Assisted Soft Tissue Procedure (FASTP) – an approach modeled after the pinhole-style concept.

During the second part of each day you will be performing soft tissue surgeries under the guidance of the experienced periodontist faculty. It will be two doctors assigned per chair. You will perform a surgery while your partner assists and vice versa. The course takes place in our dedicated training facility in Santo Domingo, Dominican Republic.

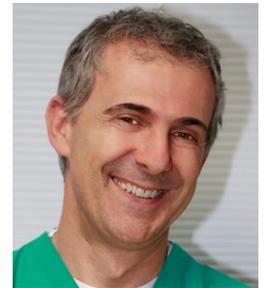

PARTICIPANTS WILL LEARN:

- Gingival recession
- Connective tissue grafting
- Free gingival grafting
- PRP-enabled root rehabilitation (PERR)
- Crown lengthening

DR. DARIO DELEONARDIS

Dr. Dario DeLeonardis is currently Adjunct Associate Professor at the University of New Jersey and Visiting Professor at the Center for Dental Implants of the University of Miami where he was Associate Professor from 1994-2004.

He is also Professor of Periodontology for the Specialization Course in Clinical Periodontology at the University of Chieti. He is an active member of the American Academy of Periodontology, the Italian Academy of Microscopic Dentistry and of the Italian Society of Osseointegration.

He actively dedicates himself to research and development of clinical applications in the field of Periodontology, Bone Reconstructions and Oral Implantology.
