

# Dermal Fillers with PRP

## LIVE PATIENT COURSE

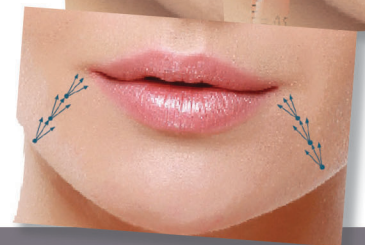

This in-depth training provides complete education of aesthetic treatment plans using PRP, specifically created for dental professionals to capitalize on their existing clientele by offering new services and also attract new clients, meanwhile maximizing profits!

### COURSE OVERVIEW

This two day course with full-day lecture and full-day live-surgery, participants will become proficient in the use of fillers with PRP for facial rejuvenation. Through one-on-one mentored instruction, attendees work hands-on with 1 assigned patient during the clinical day to learn step-by-step treatment techniques, including proper tissue depths, patient mapping, and preparation for optimal therapeutic and esthetic outcomes.

#### Attendees will learn:

- Patient assessment, evaluation, and consultation.
- Indications and contraindications.
- In-depth instruction in the anatomy, neurophysiology, musculature and circulatory system of the oral and maxillofacial areas.
- Proper sterile technique for the use of injectable solid fillers.
- Safety and risk issues.
- How to integrate dermal filler therapy into therapeutic and esthetic treatment plans.
- How to create beautiful vermilion borders.
- How to smooth, tighten, and lift nasolabial folds, marionette lines, jowls, and the corners of the mouth.
- Business strategies.
